Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 5/19/02.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 5-14 lack antecedence for "triggering".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-5, 8, 11, 12 and 14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Mehra, US 5,275,621. Note the discussion of plural refractory intervals at column 12 line 18 to column 14 line17, the intervals being triggered off an intrinsic R-wave during tachycardia.

Claims 1, 3-9, 11, 12, 14, 15, 17, 19, 20, 24-30, 34 and 41 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Weiner et al., US 5,643,326. Note that during atrial blanking, ventricular events would inherently remain undetected. The atrial

Art Unit: 3762

refractory period is read as the second blanking/refractory period. The extendable atrial blanking period being the claimed floating period in Claim 25, for example, and such addition amounts to the claimed delay in Claim 41.

Claims 1-22 and 24-41 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Routh et al. (cited by Applicant). As to Claim 1, Routh et al. contemplate programmability of the AABP, in the phrase "AABP is preferably not adjustable", col. 5, lines 62-62, even though the preferred option is to not make it programmable. As to the claims related to dependence on ventricular events, since both blanking periods start after a sensed event in the ventricle, i.e. the AABP starts, the initiation of the refractory periods are deemed to start if ventricular events are sensed. Note too that all events are blanked when the amplifiers are not sensing.

Allowable Subject Matter

Claim 23 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
